

Human Informed Consent Form

Instructions to the Student Researcher(s): An informed consent/assent/permission form should be developed in consultation with the Adult Sponsor, Designated Supervisor or Qualified Scientist. This form is used to provide information to the research participant (or parent/guardian) and to document written informed consent, minor assent, and/or parental permission.

- When written documentation is required, the researcher keeps the original, signed form.
- Students may use this sample form or may copy ALL elements of it into a new document.

If the form is serving to document parental permission, a copy of any survey or questionnaire must be attached.

Student Researcher(s): Katherine

Title of Project: Art Against the Machine

I am asking for your voluntary participation in my science fair project. Please read the following information about the project. If you would like to participate, please sign in the appropriate area below.

Purpose of the project: My goal of this project is to hopefully push for some manner of policy change within AI generation, as (also hopefully) showcased through the results of this project. If not, I hope that I could at least bring more of a public awareness as to why AI art is a problem not only for just artists, but our greater society as a whole.

If you participate, you will be asked to:

You will be able to utilize a site in order to vote on which of the 2 presented images is "AI-generated" and/or fill out a form with questions regarding age range, level of formal education, level of knowledge about AI images, how often they use AI image tools, level of knowledge about art/photography, opinions on AI, and how AI art has affected their lives.

Time required for participation: 15 mins, more or less

Potential Risks of Study:

Throughout your participation, you may view a disturbing image. We will review every image before allowing it onto the website, but everyone has different triggers that will be impossible for us to completely cover. The risk of a data breach is also minimal considering the services that we use (mongoDB, Cloudinary, and Google) are considered to be reputable.

Benefits:

By participating in this study, you are supporting our purpose of pushing towards the cleansing of "AI art slop" from the internet -- our ultimate goal of freeing the internet once more with creativity.

How confidentiality will be maintained:

Only the people working on this project will be able to view such databases. In addition, no identifying information (name, email, etc.) will be attached to you -- the participant -- unless you create an account with your email.

If you have any questions about this study, feel free to contact:

Adult Sponsor/QS/DS: Cameron Jones Phone/email: cameron@ucsd.edu

Voluntary Participation:

Participation in this study is completely voluntary. If you decide not to participate there will not be negative consequences. Please be aware that if you decide to participate, you may stop participating at any time and you may decide not to answer any specific question.

By signing this form I am attesting that I have read and understand the information above and I freely give my consent/assent to participate or permission for my child to participate.
